SUMMARY

QA Automation Engineer with **5 years of experience** in **banking and fintech** products (digital wallets, core banking and high-availability payments). I started as a manual tester, which gives me the judgment to prioritize risk and critical flows. Today I automate UI and API tests with **Playwright + TypeScript** (Page Object Model, data-driven tests), with continuous integration on **GitHub Actions** and **AI-assisted QA (Cursor)**. Public projects on GitHub: **E-bike Tucson** (pytest, Vitest and Playwright) and **QA Automation Learning**.

SKILLS

Test Automation, Playwright, TypeScript, Page Object Model, Data-Driven Testing, API Testing, Continuous Integration (CI/CD), GitHub Actions, Python, pytest, Vitest, JMeter, Manual Testing, Functional Testing, Non-Functional Testing, Regression Testing, Smoke Testing, Black-Box Testing, Web Testing, Mobile Testing (Android, iOS), Desktop Testing, Database Testing, Test Plans, Test Cases, Bug Tracking, Defect Management, Scrum, Agile, Jira, Xray, Postman, Swagger, SQL, Oracle, MySQL, ASEiSQL, Android Studio, Red Hat, OpenShift, Git, AI-assisted QA (Cursor), IT Banking, Core Banking, Fintech.
